

Torquay

Spin-FX / Nitrile / Composite | 327530

The Torquay Spin-FX™ is a 150mm men's lace-up safety boot with a BOA® fit system and scuff guard.

Upper Materials

Full-grain (Black) cowhide water-resistant leather upper with double stitching in nylon thread. Features a scalloped, padded collar and tongue. Powered by the BOA® Fit System, the unique Spin-FX™ is designed to enhance performance and comfort. Made up of 49 strands of stainless steel (7 bundles of 7), braided together, injected and wrapped with nylon, the system is incredibly strong and durable.

Toe Cap

200J Composite Toe Cap

Lining Materials

This boot is lined with Baltico®, a soft, non-abrasive, hydrophobic material that wicks perspiration away from the foot, keeping the skin cool and dry.

Full Innersole

A full-length footbed is inserted into the footwear to provide additional support and comfort. This footbed is made from soft polyurethane, which will retain its shape and thickness throughout the life of the boot.

Insole

Heavy-duty, flexible, antibacterial, non-woven insole.

Midsole

Directly moulded polyurethane midsole for greater shock absorption.

Outsole

The Anti-static Nitrile Outsole offers superior resistance to abrasion and heat resistance to 300°C.

Trisole® Comfort Technology

The Steel Blue soling system is a patented three-density soling system that provides a high level of comfort, shock absorbency, and energy return. The system uses PORON® as energy-absorbing pads placed under the pressure points of the foot to deliver superior comfort and offers shock absorbency comparable to that of sports footwear.
