

Mackay

Nitrile / Bump / Met / PR | 382835

The Mackay is a 370mm men's pull-on high-leg boot with a metatarsal guard, penetration-resistant midsole and bump cap.

Upper Materials

Full-grain (Black) cowhide waterproof leather upper with double stitching in nylon thread. This waterproof boot includes a breathable membrane that is directly laminated to the inner side of the upper sealing the material and all seams. The upper is then lasted and sole directly moulded to complete the waterproofing process. Features an internal Metatarsal Guard to protect the arch and forefoot.

Toe Cap

200J Steel Toe Cap

Lining Materials

This boot is lined with Spacerknit®, which is a soft, nonabrasive, hydrophobic material that wicks perspiration away from the foot, enabling the skin to remain cool and dry.

Full Innersole

A full-length footbed is inserted into the footwear to provide additional support and comfort. This footbed is made from soft polyurethane, which will retain its shape and thickness throughout the life of the boot.

Insole

Heavy-duty, flexible, antibacterial, non-woven insole.

Midsole

Directly moulded polyurethane midsole for greater shock absorption. Penetration resistant midsole to prevent sharp objects getting through to your foot.

Outsole

The Anti-static Nitrile Outsole offers superior resistance to abrasion and heat resistance to 300°C.

Trisole® Comfort Technology

The Steel Blue soling system is a patented three-density soling system that provides a high level of comfort, shock absorbency, and energy return. The system uses PORON® as energy-absorbing pads placed under the pressure points of the foot to deliver superior comfort and offers shock absorbency comparable to that of sports footwear.
